Who is TQCAS?

We are one of the leaders in Quality Assurance providing our clients with the tools and expertise to minimize risk and move forward with their projects in confidence. Our Consultants hold the expertise in providing consultancies and help our Clients in integrating their processes and systems with your business objectives, in compliance with the Standards.

With over 35 years of worldwide experiences in various sectors, our Consultants have been providing recommendations towards improvisation of the processes of your organization for making them effective. TQCAS as a company is provided with all resources to implement various Standards for both processes and product certifications thus making it as a one point solution for various industries towards achieving their quality objectives.

Why TQCAS?

Due to the globalization of businesses, International Standards like ISO is getting the prominence as well as the Industry best practices like Lean Manufacturing Practices, Total Productive Maintenance, Kaizen, Poka-Yoke, and many other practices are being implemented in various industries.

To fulfill these requirements, we at TQCAS have a panel of Consultants who have worldwide experience and have the expertise of various industries. These experts have multiple years of consulting experience in their fields and have helped many companies in achieving their objectives of going global with effective processes and systems, and recognition through obtaining the relevant certifications.

By working with us as a team, we at TQCAS will help you in improving your quality by conducting a diagnostic study of your organization, and presenting an analytical report with gap analysis, our step-wise recommendations to bridge the gaps as well as deliverables at each stage to meet the set business objectives. In case you are interested, we could also conduct an IT Strategy Implementation to align your systems and processes to support your business objectives.

In total, we can implement systems and processes that would result in improving the profit margins and reduction in overall cost of production without making any additional investment.
